

**APPENDIX 1**

**LISTS OF TRAFFIC FLOWS ON MAJOR ROADS IN 2010**

## **LISTS OF TRAFFIC FLOWS ON MAJOR ROADS 2010**

This Appendix includes the following information:

- A list of traffic flows on major road links in Stockport in 2010 sorted by road class and all motor flows.
- A list of traffic flows on major roads links in Stockport in 2010 sorted by 12-hour pedal cycle flow.

The motor vehicle flows are estimates of the 24-hour, annual average weekday flows. They are based mainly on 12-hour manual classified traffic count and ATC data collected as part of the Unit's countywide monitoring programme. They represent the flow at a specific point on each link. Flows on links not counted in 2010 have been estimated by applying average countywide growth factors to earlier counts. Therefore the flows given here, whilst being our best estimates for 2010 cannot be used to indicate growth since 2009 on individual links.

Two sets of pedal cycle flows are presented: the counted 12-hour flows and an estimate of 24-hour annual average weekday pedal cycle flows for 2010 using factors derived from a set of automatic cycle count data.

Maps showing motor vehicle flows, pedal cycle flows and DfT link numbers are included in Appendix 4.
